A. RATIONALE

Core skills enhance knowledge, analytical ability, problem solving ability, understanding or comprehending scientific principles and drawings & designs also. At the same time it creates the base for achieving Hard skills. To carry out any skill related task knowledge about basic Engineering Drawing is essential as *drawing is the language of engineers*.

Knowledge of Engineering Drawing complements the skills of an Artisan / Trade person. More importantly, ability to read drawing increases the productivity of a person besides enhancing confidence to perform task competently.

Recognising this importance the core skills (Engineering Drawing) made an integral part of all Engineering Trades under NCVT.

The content of Engineering Drawing is common for first two semesters for all Engineering Trades having more than two semesters. The contents of 3rd & 4th semester are made trade specific to fulfill the requirement of each trade.
